

# Bagless Back Pack Vacuum Cleaner

## The Advantage

The Next Generation of Back Pack Vacuum For Professionals

- Bagless
- Consistent suction for faster, better cleaning
- Odour and germ-free air emission
- Maximum user comfort
- 2 year body, 3 year motor warranty

# The Advantage – Bagless Back Pack Vacuum Cleaner

## Save money and time with bagless vacuuming

Eliminate the need to use, clean replace or buy, cloth or paper vacuum bags. With the Advantage, emptying the canister is as quick as a press of a button. Save with no bag replacement costs, and spend more time cleaning and less time emptying. It all adds up to the lowest cost of vacuuming, and the added bonus... you can always see when it's time to empty the dust canister.

## Consistent suction for faster, better cleaning

The Advantage's 3-Tier, Dual Core, STAC® (Swirl Tube Axial Cyclone) technology combined with a high efficiency motor gives powerful and consistent suction. Tests show The Advantage picks up to 200- 300% more dirt and dust in a week versus conventional vacuums using bag filters. Vacuum more area in less time equals the best cleaning results.

Swirl Tube Axial Cyclone Technology

## Dust & Germ-free air for cleaner environments

The Advantage has Antimicrobial Technology in the internal plastics, vacuum hose and motor filter (Efficacy at >99.9%) and odour control inhibitors to help reduce and eliminate nasty germs and odours from being emitted back into the air. Leave cleaner, fresher air behind when you finish vacuuming, promoting a healthier environment for you and the people in it.

3 Tier Dual Core Filtration with Antibacterial Technology

# The Advantage – Bagless Back Pack Vacuum Cleaner

## Easier, faster emptying

The anti-static and hydrophobic properties of the canister means dust and moisture are repelled for fast easy cleaning. Simply twist the latch to remove the canister, press the single button to release the lid and watch the dust just fall out into the bin – all with one hand... it's just so simple and quick!

## Built with durable design and construction

The Advantage is designed to last using quality durable components. With a strong chassis the internal construction uses low friction, water repelling, anti-static and antimicrobial plastics – the best in the market and first to market technologies. The Patented Long Life Ametek vacuum motor delivers confidence in long term performance of the Advantage.

## Maximum operator comfort

Made for the professional cleaner, the Advantage uses hard and soft water resistant foam pads, contoured shoulder pads and an adjustable stretch belt for the highest levels of support and comfort over hours of use. Ergonomics is enhanced with a swivel-neck, low profile EZ2GO floor tool, designed for light, easy maneuvering around hard-to-reach spaces and across a variety of floors to prevent unnecessary bending, twisting, arm fatigue and discomfort.

## Protect your cable with a smart cord restraint

The Advantage's Strainless®, quick change cord restraint, helps reduce cord stretching and tangling. The smart design makes changing the cable easy and quick. The cord restraint is positioned away from your feet to help reduce the risk of walking back onto the cable when vacuuming – simple design with a clear purpose.
